

We eliminate the challenges,
you capture the market.

Manufacturing Space: 29,000 sq. ft.

Industry Focus: Military & Aerospace
Industrial & Commercial
Medical & Biotechnology

Overview:

Irvine, CA operations are uniquely qualified for handling projects for engineering services and OEM's from a wide-range of industries including military & aerospace, medical and industrial. The equipment in the facility is quite efficient for performing both long standing manufacturing procedures as well as state of the art technology. This location features process technology and test capabilities geared towards (ESD) componentry not typically found in today's commercial products.

Key Capabilities:

- Circuit card assembly
- Electromechanical sub-assembly and full assembly
- Cable and wire harness assembly
- Electrical and functional testing

Services Capabilities:

- Project management
- Supply chain management
- Test development

Certifications:

- ISO 9001
- AS 9100
- ITAR registered
- EN13485
- J-STD space certified

Application Experience:

- Semiconductor equipment
- Analyzer instrumentation
- Military helicopter components
- Satellite communications
- Pressure sensors
- Wireless transmitters
- Control systems
- Medical imaging

Technological Expertise:

- Electronics
- RF communication
- Full turn-key supply chain management
- DFM for optimal manufacturability and cost improvement
